CT-1125 RollerRap™

8 mils thick, long wearing, economical tape that positively repels adhesives and inks when wrapped or wound over rollers. This product instantly restores surface worn or damaged rollers to serviceable condition.

EASY TO APPLY

Goes on smoothly and evenly whether it is applied in sheet form or spiral wrapped. It can be lifted and repositioned during application and it is selfwound so there's no backing to strip away.

EASY TO REMOVE

RollerRap™ has a pressure sensitive cured rubber adhesive on the face side which removes easily from the roller surface without residue.

MORE GRIP THAN TEFLON TAPES

The silastic surface of RollerRap™ has a natural grip unlike Teflon tapes requiring embossing to provide "grip". RollerRap™ features abrasion resistance equal to or better than Teflon tapes. It is less fragile, takes more abuse, and tolerates temperatures to 400° F.

OTHER APPLICATIONS

As a container liner it both protects and facilitates cleanup. Any materials left after mixing adhesives may be allowed to harden and then simply peeled away.

It can be used in plastics moldings and processing applications. Because of its extremely low surface tension, RollerRap™ positively prevents adhesives, inks, many plastics and other materials from adhering.

PACKAGING

CT-1125 RollerRap™ comes in 12", 24", 36" and 48" widths or can be slit to custom widths.
Roll length is 36 yards; minimum purchase is 12
